About OFD Officers

The goal of the P&I OFD is to create a thriving and diverse department with professionally happy and healthy faculty who are productive, well recognized, and respected within the Washington University School of Medicine and within Academic Pathology & Immunology worldwide. Our core values are Excellence, Respect, Inclusion, and Diversity.

Officers work with OFD to support the goals and core values of the office. Officers will have a 1 year appointment, with the possibility of renewal. Officers will work on a specific programming initiative or content area (see below) and will enhance representation and diversity of the OFD across the divisions and career pathways of the department.

The OFD and all of the officers will meet monthly. Individual officers may meet with the OFD Vice-Chairs more frequently as needed. The officer will provide input to OFD in their area and will also participate in OFD programming or events that relate to the area of the officer.

Faculty at all ranks and in all tracks are eligible to serve as OFD officers. This is an excellent opportunity for leadership experience and to get involved in the Department. If you are interested in serving in one of these positions, please notify Carey-Ann Burnham and Ann Gronowski. The next application cycle will open in January of 2022.

P&I Junior Faculty Mentoring Program

[ABOUT](#)[DIVISIONS](#)[RESEARCH](#)[EDUCATION](#)[CLINICAL SERVICES](#)[FACULTY DEVELOPMENT](#)[PEOPLE](#)[NEWS](#)[CALENDAR](#)

For Mentees

Ensuring a Successful Mentoring Experience

OFD is here to assist you with the forming of a supportive community-based mentoring committee to provide you clear, objective advice and facilitate networking and faculty development opportunities to build a successful academic career.

The [Guidelines for Junior Faculty Mentoring Program](#) were developed to ensure a program that provides the structure to keep your committee active and moving forward through your progression in academic rank.

Office of Faculty Development

[Annual Report](#)[Appointments and Promotions](#)[Career Development](#)[For Mentees](#)[For Mentors](#)[Skills](#)[Contact OFD](#)[Department Awards](#)[Diversity, Equity & Inclusion](#)[Educational Programs](#)[Faculty Features](#)

<https://pathology.wustl.edu/office-of-faculty-development/career-development/for-mentees/>

Mentoring Committees (Junior Faculty)

- Intended to be **advisory**, rather than evaluative
- Not a substitute for annual meeting with Division Chief/Department Head

Committee Composition:

- Typically, three but no more than five faculty members
 - Committee members associate or full professor
- At least one member should be faculty in another Department (or another institution)
- Mentee will select one committee member from WUSTL to serve as the committee chair
- Composition of the committee can evolve with the junior faculty's career objectives

<https://pathology.wustl.edu/office-of-faculty-development/career-development/for-mentees/>
<https://pathology.wustl.edu/wp-content/uploads/2020/05/1-JFMP-Guidelines-2020.5.pdf>

Mentoring Committees (Junior Faculty)

- Committee to be developed in conjunction with, and reviewed by P&I OFD
- Meetings every 6 to 12 months
- Mentee to provide CV and update form 1 week in advance of meeting
- Meeting ~1 hour
 - Brief PowerPoint to focus discussion, outline major points for feedback
 - Use meeting for feedback (not re-statement of update form or CV)
 - Be prepared! Make the most of your time!

Mentoring Committees (Junior Faculty)

- Committee chair provides feedback to the P&I OFD
- Feedback loop/communication between mentoring committee and Division Chief
 - Meeting Summary
 - Communication through OFD

Mentoring Committee Meeting Update Form Elements

- What part of your profession/position gives you the most satisfaction?
- Which accomplishments since your last committee meeting (or from the past year if the first meeting) are you most proud of?
- What were your challenges since your last meeting?
- What things went well since your last meeting?
- What would you like to accomplish (start, finish) this upcoming year?
- List the committees that you participate on, both inside and outside of Washington University
- In what areas would you like specific advice and guidance?
- Are there areas that your Division Chief has specifically indicated on which you should focus?
- Are there any specific ways you would like your committee members to sponsor or connect you?

Annual Mentoring Committee Meeting Discussion Form

(Please distribute to mentoring committee members at least one week prior to meeting. Please include an updated CV with this form.)

- What part of your profession/position gives you the most satisfaction?

Empty text box for response to the first question.

- Which accomplishments since your last committee meeting (or from the past year if the first meeting) are you most proud of?

Empty text box for response to the second question.

Meeting Summary Form

- Submitted by the Committee Chair
- The summary should not score or rank the faculty mentee
- Cover all aspects of academic work
 - (e.g. research, education, clinical, professional development, service at the medical school or hospital, service outside of the school, etc.)
- General summary of topics discussed at the meeting
- Additional resources that the faculty member needs to thrive
- What is going well?
- Did the committee identify opportunities for improvement or advancement for the faculty member?

Appointments and Promotions Guidelines and Requirements (APGAR)

- Investigator Track
- Research Track
- Clinician Track

Appointments and Promotions Guidelines and Requirements (APGAR)

- Investigator Track (Tenure Track)
 - Faculty members on the Investigator Track are involved in basic biological, biomedical, clinical, and/or educational investigation, and accomplishment in this realm is the primary basis for promotion on the Investigator Track
 - Appointment and promotion are based generally upon investigation and scholarly activities, teaching, clinical excellence (where appropriate), and service. Although all of these activities are considered, excellence in scholarly investigation is the cornerstone of a candidate's record

Appointments and Promotions Guidelines and Requirements (APGAR)

- Research Track
 - Faculty on the Research Track are involved in basic biomedical investigation, clinical, and/or educational investigation and must meet a standard of excellence based upon research accomplishments.
 - The primary focus of Research Track faculty is to facilitate and support the overall research mission of Washington University, rather than to develop independent programs.
 - Excellence in research is the major criterion for appointment and promotion for faculty on the Research Track, although other activities may also be considered.

Appointments and Promotions Guidelines and Requirements (APGAR)

- Clinician Track
 - The Clinician Track provides a mechanism for recognizing and rewarding faculty at WUSM who excel in one or more of the areas of patient care, education, administrative and research functions that assure the delivery of excellent patient care through current practice and/or by training future clinicians
 - Essential criteria for promotion for faculty members on the Clinician Track are superior clinical skills and recognition, and involvement in the teaching mission of the Medical School

Department of Pathology & Immunology Promotion Criteria Guidelines--Clinician Track

Background from APGAR document

The Clinician Track provides a mechanism for recognizing and rewarding faculty at WUSM who excel in one or more of the areas of patient care, education, administrative and research functions that assure the delivery of excellent patient care through current practice and/or by training future clinicians. Faculty members on the Clinician Track will have professional skills and knowledge necessary for superior clinical efforts and/or Assistant Professors on the Clinician Track will receive one-year renewable appointments. Written notice that an appointment is not to be renewed shall be given to Instructors and Assistant Professors in advance of the expiration of their appointments in accordance with Section IV.B.4 of the Academic Freedom, Responsibility, and Tenure document. Associate Professors on the Clinician Track will receive rolling four-year appointments renewable annually. Written notice that an appointment is not to be renewed shall be given to Associate Professors at least three years in advance of the expiration of their appointments. Full Professors on the Clinician Track will initially receive rolling five-year appointments renewable annually; after 10 years as a Professor, the faculty member will receive rolling six-year appointments renewable annually. Written notice that an appointment is not to be renewed shall be given to full Professors holding five-year appointments at least four years in advance of the expiration of their appointments; five years advance written notice is required for full Professors holding six-year appointments. Essential criteria for promotion for faculty members on the Clinician Track are superior clinical skills and recognition, and involvement in the teaching mission of the Medical School. Faculty are strongly encouraged (but not required) to engage in scholarly activities that contribute to the advancement of medicine or teaching, and will be expected to effectively carry out their administrative responsibilities. More specific criteria for appointment and promotion to each rank on the Clinician Track are set forth below.

Background considerations for Department of Pathology & Immunology

Faculty members on the Clinician Track will have professional skills, attitudes, and knowledge necessary for superior clinical efforts and/or educational leadership and will be evaluated on the basis of their individual skills and **unique contributions** to the University and beyond. Advancement in faculty rank, or promotion, on the clinician track requires **building an internal and external reputation for exceptional clinical skills and recognition for exceptional educational performance**. There are many pathways to develop this reputation for excellence in a clinical niche, with scholarly activity being the central hub connecting these pathways. Some examples include recognition of skills by local colleagues and trainees, publications, leadership positions on internal and external committees, participation in externally funded research, and successful collaborative accomplishments in professional groups or organizations. Building a reputation to support promotion is hard work and requires efficiency in clinical, educational, and administrative roles, passion for being in the academic environment, collaboration, and cooperation.

Promotion Considerations—P&I

- Aspects of evaluation
 - Individual skills and **unique contributions**
- Promotion on clinician track requires building an **internal and external reputation** for **exceptional** clinical skills and recognition for **exceptional** clinical performance
 - Scholarly activity
- Building the reputation to support promotion is hard work!
 - Requires passion for being in the academic environment, collaboration, cooperation

Building (and documenting) internal and external (regional, national) reputation

- Peers select you to share and apply your expertise
 - Speaking at national meetings
 - Invited articles
 - Visiting professor
 - Journal editorial board or editor
 - Refer cases to you for sign out
- Leadership roles in professional groups and organizations
- Awards contributions or innovations in area of expertise
- Election to professional academies
- High-impact publications
- Measurable accomplishments (i.e. not simply a measure of years on faculty)

Directly from the APGAR

Examples for P&I

Criteria	APGAR Document Criteria	Examples of Metrics for Associate Professor <i>Note: these are examples, this is not a checklist</i>	Examples of Metrics for Professor <i>Note: these are examples, this is not a checklist</i>
Clinical Excellence	<p>For appointment and promotion to this rank, faculty are expected to be outstanding clinicians in their respective fields, have achieved sufficient reputation that they receive referrals of challenging clinical problems from physicians and/or professional colleagues and other institutions in St. Louis and regionally, and to be competent to provide a level of care or service that is regarded as outstanding in comparison to their peers. At the time that appointment or promotion is being considered, opinions on clinical performance will be gathered from senior faculty members and other physicians and/or health professionals and trainees who have interacted with the candidate and can judge his/her abilities. The evaluation of clinical excellence also includes recognition of unique clinical expertise as determined by superior performance of consultative services (intensive care units, interventional radiology, rehabilitation, prevention etc.)</p>	<ul style="list-style-type: none"> Reputation as clinical expert Leadership roles related to clinical expertise Role in development of innovative models of care delivery Professional attitude and interactions Invitations to speak on topics related to area of clinical expertise Active role in professional organizations related to clinical expertise Service on guideline or policy committees relevant to area of clinical expertise Awards for contributions or innovations in the area of clinical expertise Role in development of guidelines or protocols for clinical care Publications (including original research, chapters, reviews, textbooks) in area of clinical expertise 	<ul style="list-style-type: none"> Visiting professorships and invitations to speak nationally or internationally on topics related to area of clinical expertise Leadership roles in national or international professional organizations related to area of clinical expertise Service on national or international committees developing guidelines or policy related to area of clinical expertise Editor of a journal in area of clinical expertise National awards for contributions or innovation related to area of clinical expertise Having a critical role in defining a new field Developing protocols or methods that influence the standard of care

Criteria	APGAR Document Criteria	Examples of Metrics for Associate Professor Note: these are examples, this is not a checklist	Examples of Metrics for Professor Note: these are examples, this is not a checklist
			<p>Publications demonstrating cognitive or technical expertise in a clinical area</p> <p>Professional attitude and interactions</p>
Teaching and Education	<p>Excellence in teaching and leadership in education is an important consideration for promotion to Associate Professor on the Clinician Track.</p> <p>Teaching and leadership in education can take many forms and includes involvement in curriculum and course development, curricular review, innovations in teaching and assessment methodologies, course management, educational program management, teaching of medical students, residents, fellows, and graduate students in a classroom setting as well as one-on-one on the inpatient wards and in outpatient clinics. Evaluation of teaching and educational activities should be supported by a teaching portfolio (see Appendix B) and should include the following:</p>	<p>Didactic Teaching (lectures, CME courses, grand rounds, professional development programs, seminars).</p> <p>Mentorship (mentor for medical student, graduate student, clinical or postdoctoral fellow or junior faculty research projects, thesis committee member)</p> <p>Medical school curriculum development</p> <p>Clinical teaching</p> <p>Administrative teaching leadership role (e.g. residency or fellowship director, course or seminar director or co-director)</p> <p>Quality may be measured by evaluations and success of the courses/programs for which the faculty member was a leader.</p> <p>Publications with mentees</p>	<p>Participation as a mentor in training grants or K-awards</p> <p>Mentorship of junior faculty (a primary mentoring relationship, including formal documentation of mentoring)</p> <p>Teaching awards</p> <p>Quality may be measured by evaluations and success of the courses/programs for which the faculty member was a leader.</p> <p>Publications with mentees</p> <p>Medical school curriculum development</p> <p>Development of CME programs</p> <p>Creation of online teaching resources</p>

Criteria	APGAR Document Criteria	Examples of Metrics for Associate Professor Note: these are examples, this is not a checklist	Examples of Metrics for Professor Note: these are examples, this is not a checklist
	<p>a. Objective, systematic evaluation by students, residents, and fellows trained by the faculty member.</p> <p>b. Objective, systematic evaluation by faculty within the department and by faculty within other divisions and/or departments in which the candidate has played an active teaching role.</p>	Development of new teaching materials	
Scholarly Activities	<p>Scholarly activities are not a requirement for appointment or promotion on the Clinician Track but are strongly encouraged, and any scholarly activities in which the faculty member has engaged will be considered towards appointment or promotion.</p> <p>a. Clinical Research. Clinical research performed should be of high quality, as demonstrated by publications, presentation at national meetings, or other types of recognition on a local, regional or national level.</p> <p>b. Other scholarly activities Appropriate activities in this regard include but are</p>	<p>It is not essential to be awarded extramural grant funding to advance on the clinician track. However, to establish a regional or national reputation in academic, pathology and laboratory medicine, scholarly activity is essential.</p> <p>Basic research</p> <p>Clinical research</p> <p>Translational research</p> <p>Development of new methods or technologies</p> <p>Principal investigator of peer-reviewed funding</p> <p>Co-investigator of peer-reviewed funding</p>	<p>It is not essential to be awarded extramural grant funding to advance on the clinician track. However, to establish a regional or national reputation in academic, pathology and laboratory medicine, scholarly activity is essential.</p> <p>Publication of first and senior author original research, chapters, reviews, or textbooks that are recognized as authoritative and are widely used or cited</p> <p>Publication of first and senior author manuscripts that demonstrate the impact of the candidate's innovation on quality of care, clinical outcomes, and/or access to care</p>

Curriculum Vitae

- All faculty members must have a curriculum vitae in Washington University format
 - <https://facultyaffairs.med.wustl.edu/appointments-promotions/wusm-cv-formatting/>

Clinician-Educator Portfolio (CEP)

- Executive summary of faculty work and contributions that are not generally included in traditional academic resumes
- Supplement to the CV that is a detailed compendium of clinical, educational, and service activities
- Required promotion document for all faculty members on the clinician track, and may be included when appropriate for Investigator or Research Track

Clinician-Educator Portfolio (CEP)

- Showcases what makes you special!
 - Quality and extent of clinical expertise, educational scholarship, innovation
- Can be used as a tool for strategic career planning and development
- Try to keep as a “real time” document

Promotion Workflow

- Division Chief presentation of faculty member to internal department review committee (by Division)
 - APGAR document
 - Regional, national, international recognition
- Internal review committee makes recommendation to Department Head (non-binding)
- Department Head submits and presents dossier to **Ad Hoc Committee**

Promotion Process-Ad hoc Committee

- Faculty member in Clinical Department:
 - 3 Clinical Department Heads (excluding the Department Head of proposed candidate)
 - 2 Basic Science Department Heads
 - 2 senior faculty members
 - Faculty member in Basic Science Department:
 - 2 Clinical Department Heads
 - 3 Basic Science Department Heads (excluding the Department Head of proposed candidate)
 - 2 senior faculty members
- Recommendation of the Appointments and Promotions Committee presented to Executive Faculty
 - Approval of appointment or promotion by the Executive Faculty
 - No further action is required for Clinician Track faculty or for Investigator Track faculty where a tenure decision is not being considered

Promotion/Appointment Packet Guidelines for all Tracks and Referee/ad hoc Review Committee COIs APPROVED REVISIONS	
Assistant Professor	<ul style="list-style-type: none"> • Department chair and/or division chief letter¹ • 3 letters (internal or external sources)^{2, 3, 4} • Clinician-Educator Portfolio (CEP) required for Clinician Track candidates⁵ • 3 key publications, Investigator and Research Track (Clinician Track candidates may submit, but not required) • CV in WUSM format
Associate Professor	<ul style="list-style-type: none"> • Department chair and/or division chief letter¹ • 7 letters (at least 5 external) for Investigator Track^{2, 3, 4} • 5 letters (internal or external) for Clinician or Research Track^{2, 4} • CEP required for Clinician Track⁵ • 5 key publications, Investigator and Research Track (Clinician Track may submit but not required) • CV in WUSM format

<p>¹Department Chair/Division Chief letter should serve as an executive summary of research/clinical/educational/public health etc. contributions and future directions. In oral presentation to the <i>ad hoc</i> committee, the Department Chair may find it helpful to provide perspective on any unique aspects and standards of review, which may differ considerably amongst disciplines.</p> <p>²COI for all:</p> <ul style="list-style-type: none"> • Family member, spouse, or significant other cannot serve as a referee or a member of the <i>ad hoc</i> committee. 	

Requests to provide letters in support of promotion

- Asked to comment on:
 - **Investigation and Other Scholarly Accomplishments:** evaluate the candidate's academic and scholarly activities, and reputation in {her/his} field, including regional, national, and international. Comment on the originality, quality, and impact of the work.
 - **Clinical Excellence:** evaluate unique clinical expertise, referrals of challenging clinical problems, service to clinical laboratory program. Have Dr. XX's clinical accomplishments received recognition beyond the Washington University community?
 - **Teaching and Education:** evaluate teaching and leadership in education, including didactic, clinical, and administrative teaching and education, curriculum development, mentorship activities, invited presentations, regional, national, or international impact
 - **Service to the Medical Center, University and Community:** evaluate contributions to governance, leadership roles and activities, regional, national, and international reputation
 - **Relative ranking** in the field for career stage
 - **Overall assessment**
- Make it as easy as possible for the letter-writer to craft a **detailed, personalized, positive letter** that highlights **your unique contributions**

Faculty Annual Review—WUSM Policy

- “All long-term faculty members employed by Washington University at the **Instructor and Assistant Professor** levels on **all tracks** have an **annual review**. This policy does not apply to fellows who are given instructor level appointments”
- “**Associate Professors** have a review at least every **two years**, and **Full Professors** have a review at least every **three years**”
- A **written summary** of the review is required
- Faculty members will be given a copy of the signed review or summary form

Faculty Annual Review: Goal

- Promotion discussion of **performance** and **future goals** between faculty member and leadership (retrospective evaluation/agree on shared future goals)
 - Document activities and achievements
 - Provide feedback (both positive and areas for growth)
 - Define goals for upcoming year
 - Define a plan for academic and professional development

Orientation for New Faculty
August 2021

Washington University in St. Louis

SCHOOL OF MEDICINE

Office of Education

- Established in May of 2020.
- An outcome of the department's 2019 Retreat and the development of the P&I Strategic Plan.
- Education Group for the Retreat recommended elevation of the educational mission and the coordination of educational activities across the department.

Our Goal Overarching Goal

Excellence in Education

- **Provide administrative support** for our educational programs, including the development and use of shared resources
- Interact with the Office of Faculty Development to **evaluate, promote, and reward faculty contributions** to the educational missions
- **Enhance trainee evaluation and mentorship**
- Identify gaps and barriers in current programs and **promote continuous quality improvement and best educational practices**
- Promote institutional **visibility of our educational programs**
- Develop and encourage **interdivisional educational endeavors** and activities.

Education Leadership Steering Committee

Representation from All P&I Training Programs

- Residency Programs
- Clinical Fellowships
- Physician Scientist Training Program
- Undergraduate Medical Training – Gateway Curriculum

ABOUT DIVISIONS RESEARCH **EDUCATION** CLINICAL SERVICES FACULTY DEVELOPMENT PEOPLE NEWS CALENDAR

Office of Education

The overarching goals of this Office are to support the development of the department's educational programs and to provide administrative support and use of shared resources;

- Interact with the Office of Faculty Development to promote, and reward faculty contributions to the education of residents, fellows, and students;
- Enhance trainee evaluation and supervision;
- Identify gaps and barriers in curriculum and promote continuous quality improvement and best practices;
- Promote departmental and interdisciplinary educational programs; and
- Develop and encourage interdivisional educational endeavors and activities.

Please work with me to achieve our shared vision of excellence across the entire spectrum of our educational programs.

Graduate Program

Residency

The residency programs offered through the Department of Pathology & Immunology span the broad disciplines of pathology, with programs available to suit all interests. The post-graduate training years are intense and demanding, but also rewarding and exciting. Although initial training is highly supervised, emphasis is placed on the acquisition of skills that will allow the resident to function as a confident and highly effective member of a healthcare team.

One of the Department's longstanding traditions is to provide core clinical and research training for individuals planning a career in academic pathology. However, our programs are also well-suited to individuals who plan to pursue careers in hospital- or community-based medical practice.

Hematopathology

Laboratory Genetics & Genomics

Liver/GI Pathology

Clinical Fellowships

The Fellowships are designed to train residency graduates for roles as clinical specialists and/or laboratory directors.

There are opportunities for specialized fellowship training in surgical pathology, cytopathology, hematopathology, dermatopathology, pediatric pathology, neuropathology, and various specialties in laboratory medicine, including transfusion medicine.

These one- and two-year advanced training programs are fully accredited. Intensive training, a large patient base, and the opportunity to pursue research contribute to an outstanding job placement rate.

ICTS Funding Programs

Just-In-Time (JIT) Core Usage Funding Program

The Just-In-Time (JIT) Core Usage Funding Program is designed to provide quick access to funding to use any of the [JIT Cores \(pdf\)](#) for research advancing medical knowledge that can improve human health.

The program provides support for investigators in obtaining final data that:

1. Will be used for development of a clinical/translational proposal to be submitted for extramural funding; and/or
2. Will lead to a concrete improvement in patient care (QA/QI) at Barnes-Jewish Hospital or St. Louis Children's Hospital. Details are required in the application.

Refer to the [Program Overview \(pdf\)](#) for specifics, including funding limits and deadlines.

<https://icts.wustl.edu/funding/just-in-time-jit/>

Clinical and Translational Research Funding Program (CTRFP)

As an internal grant funding program of the ICTS, the Clinical and Translational Research Funding Program (CTRFP) awards projects that promote the translation of scientific discoveries into improvement in human health. Funding is provided by the ICTS, The Foundation for Barnes-Jewish Hospital and our partner institutions: Saint Louis University, St. Louis College of Pharmacy and the University of Missouri-Columbia.

Awards will be considered for:

- **Clinical/Translational Projects** whose goals are to promote the translation of scientific discoveries into human health. Awards in this category will provide up to \$50,000 direct costs for 1 year.
- **Community-Engaged Research Projects** that involve established partnerships with communities and/or stakeholders whose health and well-being and/or service provision could be most impacted by the research. Awards in this category will provide up to \$50,000 direct costs for 1 year.

<https://icts.wustl.edu/funding/ctrfp-funding-program/>

Scientific Editing Service

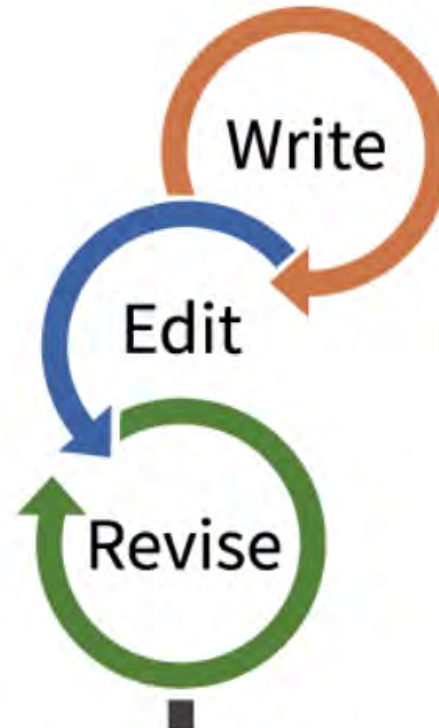

The Scientific Editing Service (SES) works with ICTS members to strengthen and clarify their extramural grant applications and manuscripts. Experienced scientific editors customize their services to meet the specific needs of your documents. The service is jointly supported by the ICTS and the Washington University Department of Medicine.

NOTE: The SES will be not be accepting service requests for grant and manuscript editing jobs between 12/15/2020-04/15/2021. We look forward to working with you again once our ICTS renewal has been submitted.

The SES can help:

- correct grammatical and typographical errors
- improve sentence structure, paragraph organization, and flow
- strengthen the scientific significance and impact
- enhance scientific specificity

<https://icts.wustl.edu/research-services/research-development-program/scientific-editing-service/>

Biostatistics, Epidemiology and Research Design

Biostatistics, Epidemiology and Research Design (BERD) activities are critical to designing and executing reproducible, quality research that minimizes bias. The ICTS' BERD team provides investigators with comprehensive support in designing and executing research at the design, implementation and analysis stages.

Review the BERD core services below for assistance.

[Biostatistics, Epidemiology, and Research Design \(BERD\)](#)

Supports all phases of research study design, data collection, data analysis, and dissemination of results.

 Rita Ann Fulton

 rfulton@wustl.edu

Erika C. Crouch, MD, PhD
Vice Chair, Office of Education

Ann M. Gronowski, PhD
Vice Chair, Faculty Affairs & Development

Carey-Ann D. Burnham, PhD
Vice Chair, Faculty Mentoring & Advancement

Training Programs

Clinician-Educator Portfolio (CEP)

- Required promotion document for all faculty members on the clinician track, and may be included when appropriate for Investigator or Research Track
- Executive summary of faculty work and contributions that are not generally included in traditional academic resumes
- Showcases what makes you special!
 - Quality and extent of clinical expertise, educational scholarship, innovation

Summaries of ongoing clinical activities

- Describe clinical activities including
 - Type of service
 - Molecular diagnostics, gastrointestinal pathology, consult service
 - Time on service
 - Weeks or months per year, quarter, etc.
 - Responsibilities
 - Describe what you do in a way a non-clinical person would understand

Development of methods for improved quality and efficiency of clinical care

- Describe the area of need and what was developed
 - New method evaluation/validation and implementation
 - Rapid improvement events
 - Involvement in initiatives such as EPIC
 - Policy and procedure development
 - Involvement in QI initiatives with high impact
- Describe who was involved in the development (solo, panel, team), your role, **outcomes**, and target audience

Example: Problem/Solution/Outcomes

- Laboratory standardization (2017-present)

Problem: Non-standardized test naming and performance across BJC creates risk (e.g. inappropriate test ordering, confusing test reports that lead to inappropriate patient care).

Solution: I helped develop the BJC Clinical Laboratory Steering Committee.

Outcomes: Through my contributions to this committee, we have standardized several critical tests across BJC, including BMP/CMP, CBC, and urinalysis. See the description of the committee below under Community Service for more details.

Documenting Teaching/ Educational Contributions

- Classroom, clinical, other
 - Indicate your role: Course Master, Lecturer, Small Group Leader
- Describe courses, lectures, symposia, panels
- Indicate target audience (medical students, nursing, residents, graduate students)
- Time commitment (number of hours per week, month, or year)

Documenting Mentoring Activities

- **Meaningful** mentorship experiences
- List name of mentee, time-period, activity
- Include current position of mentees who have completed mentorship period
- Divide into sections for different types of mentees (medical student, fellow, faculty, graduate student, etc.)
- Briefly describe mentorship provided
 - Graduate and medical students, residents, fellow, other faculty
 - Career development
 - One-on-one training in specific area of expertise
