

Department of Pathology and Immunology

Pathologist

The Department of Pathology & Immunology at Washington University School of Medicine is recruiting a **Pathologist** (Voluntary Clinical Appointment) to join the Division of Anatomic and Molecular Pathology. The pathologist will provide general pathology and cytopathology services for Washington University Pathology Services, primarily serving at Memorial Hospital Belleville in Belleville, IL (in the greater St. Louis metropolitan region) and will assist with onboarding new pathology services in the St. Louis region (within an approximate 200 mile radius). Although the role will be to provide general pathology and cytopathology services, it is recommended to have subspecialty surgical pathology training in one of the following: gastrointestinal, genitourinary, or gynecologic pathology, but this is not required. Board certification in anatomic pathology and clinical pathology, and eligibility for licensure in the States of Missouri and Illinois, are required.

The clinical service of the Memorial hospitals and clinics includes a wide variety of interesting surgical pathology cases, with approximately 8,000 surgical cases per year. The laboratory medicine operations of the Memorial system include standard chemistry, hematology, and microbiology diagnostic services, and a blood bank that annually transfuses approximately 4,000 units of red cells. The Memorial laboratory is CAP certified and has an AABB certification.

Education and Expectations: Candidates must possess M.D. or M.D./Ph.D. degrees as well as Board certification for Anatomic and Clinical Pathology through the American Board of Pathology. Excellence in diagnostic surgical pathology and laboratory medicine is expected. General knowledge of and experience with digital pathology in clinical practice is recommended. The professional practice components will be supported by and integrated into the operations of the Department of Pathology and Immunology. Thus, the pathologist will interact with, and be supported by, other pathology faculty across the full range of subspecialty areas in both surgical pathology and laboratory medicine.

The Department (<http://pathology.wustl.edu/>): The Department of Pathology & Immunology excels in basic and clinical research as well as delivery of outstanding pathology and laboratory medicine services. In 2015, the department moved to a new facility at the center of the Washington University Medical Campus. The Department provides a supportive environment for research and teaching. Across nine AP fellowships, six CP fellowships, and the core residency program, there are a total of 66 GME trainees.

The School (<http://medicine.wustl.edu/>): *U.S. News & World Report* ranks WUSM among the top ten in the nation and first in academic selectivity. Eighteen Nobel laureates have trained or carried out research here. Thirteen faculty members are fellows of the National Academy of Sciences, and 24 belong to the Academy of Medicine. WUSM is 10th among U.S. medical schools in grants received from the National Institutes of Health (\$582 million in 2020).

The City: St. Louis an urban center of diversity, culture, and entrepreneurship within a metro area of 2.6 million. The region offers affordable housing, unique neighborhoods, and convenient transportation. The bi-state region (Missouri and Illinois) offers easy access to outdoor recreation opportunities. Salary and rank will be based on background and experience. Interested candidates should submit their curriculum vitae, a personal statement, and three references to:

Individuals completing their fellowship training, and individuals who are in practice, are encouraged to apply. Salary and rank will be based on background and experience. Interested candidates should submit their curriculum vitae and three references to:

Joseph Gaut, MD, PhD
Division Chief, Anatomic and Molecular Pathology
Department of Pathology & Immunology
Washington University School of Medicine
Campus Box 8118, 660 South Euclid Avenue
